Title: Broadening Peirce's Phaneroscopy: Part One

Year: 2012

Journal: The Pluralist

Volume: 7

Issue: 2

Pages: 1-29

Keywords: Phaneroscopy, Normative Science, Metaphysics

Abstract: Peirce's Mature Architectonic, or classification of the sciences, divides philosophy into three primary disciplines. They are phaneroscopy (Peirce's later name for the science of phenomenology¹), normative science, and metaphysics. Both normative science and metaphysics have sub-disciplines. Normative science subdivides into aesthetics (or, as Peirce spells it, esthetics), ethics, and logic. Metaphysics subdivides into general ontology, psychical metaphysics, and physical metaphysics.² However, Peirce never identifies sub-disciplines for phaneroscopy. Why is this?
