Title: A Guess at the Other Riddle: The Peircean Material Categories

Year: 2012

Journal: Transactions of the Charles S. Peirce Society

Volume: 48

Issue: 4

Pages: 530-557

Keywords: Categories, Kant, Hegel

Abstract: In this essay, the author seeks to identify a set of categories, or what he terms material categories, utilized but never identified by American pragmatist philosopher Charles Peirce. He connects the material categories to the science of phaneroscopy and identifies them as Forcefulness and Yieldingness. The influence of philosophers Immanuel Kant and Georg Wilhelm Friedrich Hegel in regard to their work on quality on Peirce's thought is also explained.
