Author: Norman, Jesse
Title: Provability in Peirce's Alpha Graphs
Year: 2003
Journal: Transactions of the Charles S. Peirce Society
Volume: 39
Issue: 1
Pages: 23-41
Keywords: Existential Graph
Abstract: Argues that a proof in the notion of provability in the alpha Existential Graphs (EG) can be seen sequentially and as a single whole graph. Mistake of restricting the notion of provability in EG to the memoryless view; Features of the sequential and whole graph approaches; Syntax and semantics of the alpha graphs.
