Title: Peirce and the Nature of Evidence

Year: 1993

Journal: Transactions of the Charles S. Peirce Society

Volume: 29

Issue: 2

Pages: 211-224

Keywords: Evidence, Probability

Abstract: Considers the claim that facts predicted by a hypothesis have strong evidential force, in relation to the predesignation principle of Charles S. Peirce. Problem faced by the Bayesian likelihood with known evidence; General theory of probable inference; Discussion on prediction in the Series Game, a game of skill in accommodating data.
