Type: Manuscript
Author: Peirce, Charles Sanders
Title: A Logical Criticism of the Articles of Religious Belief
Manuscript Id: MS [R] 856
Year: 1911

Abstract / From the Robin Catalogue:

Description: A. MS., n.p., 2 pp. of one of the alternative sections are dated April 5 and 7, 1911, pp. 1-18, with several alternative sections.

The contempt for religious faith in scientific circles reveals, not open-mindedness, but prejudice. Deduction, induction, and retrodution are the only kinds of reasoning. Deduction as either necessary or probable. Determinism and free will. Over-specialization on the part of the average scientist has made him culturally ignorant - a queer mixture of enlightenment and of what is the equivalent of superstition. Laws of nature. Miracles and ultramiracles. Two of the alternative sections contain a discussion of existential graphs.

Keywords: Religion, Deduction, Induction, Retrodution, Reasoning, Critic, Existential Graph, Cut, Dot, Perception, First Impression of Sense, Logic, Free Will, Law, Law of Nature, Scientific Prejudice, Miracle, Probable Deduction, Probability, Graph, Euler's Graphs
