Term:	Class
Quote:	As experience clusters certain ideas into <i>sets</i> , so does the mind too, by its occult nature, cluster certain ideas into <i>sets</i> . These sets have various forms of connection. The simplest are sets of things all on one footing and agreeing in each belonging to the set. Such a set is a <i>class</i> . The clustering of ideas into <i>classes</i> is the simplest form which the association of ideas by the occult nature of ideas, or of the mind, can take.
