

'Abduction' (pub. 19.12.12-21:36). Quote in M. Bergman & S. Paavola (Eds.), *The Commens Dictionary: Peirce's Terms in His Own Words. New Edition*. Retrieved from <http://www.commens.org/dictionary/entry/quote-lessons-history-science>.

Term: Abduction

Quote: There are in science three fundamentally different kinds of reasoning, Deduction (called by Aristotle {synagöge} or {anagöge}), Induction (Aristotle's and Plato's {epagöge}) and Retroduction (Aristotle's {apagöge}, but misunderstood because of corrupt text, and as misunderstood usually translated *abduction*). Besides these three, Analogy (Aristotle's {paradeigma}) combines the characters of Induction and Retroduction.
