'Likeness' (pub. 18.08.13-08:55). Quote in M. Bergman & S. Paavola (Eds.), *The Commens Dictionary: Peirce's Terms in His Own Words. New Edition*. Retrieved from http://www.commens.org/dictionary/entry/quote-logic-chapter-i-1.

Term: Likeness

Quote: ... the relation of a repraesentamen to its object (correlate) may be a real

relation and, then, either an agreement or a difference, or it may be an ideal r[elati]on or one from which the reference to a correspondent (subject of representation) cannot be prescinded by position. In the first case, that is where the repraesentamen has a real agreement with its object, the representation consists in a *likeness*; a simple quality of the object is shown but

the object itself is not said to exist.
