---

**Term:** Hypothesis [as a form of reasoning]

**Quote:** These differences between these two scientific inferences are so great that it seems to me essential to a right understanding of the subject that we should recognize two kinds of scientific reasoning. Induction and Hypothesis. [—] Hypothesis alone affords us any knowledge of causes and forces, and enables us to see the *why* of things. [—] So that we have

Deduction  
Induction  
and Hypothesis  
as three coördinate classes of reasoning.
