Term:	Complete Argument
Quote:	...every argument has, as portion of its leading principle, a certain principle which cannot be eliminated from its leading principle. Such a principle may be termed a *logical principle*.
	An argument whose leading principle contains nothing which can be eliminated is termed a *complete*, in opposition to an *incomplete*, *rhetorical*, or *enthymematic* argument.
Source:	Peirce, C. S. (1867). On the Natural Classification of Arguments. *Proceedings of the American Academy of Arts and Sciences*, 7, 261-287.
References:	W 2:24
Date of Quote:	1867
Editorial Annotations:	In 1893, Peirce modified the last part of this quote as follows: "Since it can never be requisite that a fact stated should also be implied in order to justify a conclusion, every *logical principle* considered as an assertion will be found to be quite empty. The only thing it really enunciates is a rule of inference; considered as expressing truth, it is nothing." (CP 2.467)
