**Term:** Necessity

**Quote:** **Necessity** [Lat. *necessitas*]: Ger. *Nothwendigkeit*; Fr. *nécessité*; Ital. *necessità*.  
(1) The state or condition that cannot be otherwise than it is; that must be just as it is.

(2) The principle in virtue of which the condition of the universe as a whole, or any particular part of it, is rendered, both as to its existence and quality, inevitable. Opposed to both freedom and chance, but especially, in its strictly philosophical use, to chance [...] or contingency. That which has the property of necessity is said to be necessary.
