Term: Sign
Quote: Remember my definition of a “sign,” upon which I have a right to insist as that of a new term of logic, just as a zoöologist has a right to define “fish” so as to exclude star-fishes, jelly-fishes, shell-fish, and whales. A “sign,” I say, shall be understood as anything which represents itself to convey an influence from an Object, so that this may intelligently determine a “meaning,” or interpretant.
