Term: Scroll
Quote: A pair of cuts, one within the other but not within any other cut that that other is not within, shall be called a scroll. The outer cut of the pair shall be called the **outloop**, the inner cut the **inloop**, of the scroll. The area of the inloop shall be termed the **inner close** of the scroll; the area of the outloop, **excluding the enclosure of the inloop** (and not merely its area), shall be termed the **outer close** of the scroll.
