'Hook' (pub. 18.03.18-17:11). Quote in M. Bergman & S. Paavola (Eds.), *The Commens Dictionary: Peirce's Terms in His Own Words. New Edition*. Retrieved from http://www.commens.org/dictionary/entry/quote-syllabus-certain-topics-logic-36.

Term:	Hook
Quote:	A <i>spot</i> is a graph any replica of which occupies a simple bounded portion of a surface, which portion has qualities distinguishing it from the replica of any other spot; and upon the boundary of the surface occupied by the spot are certain points, called the <i>hooks</i> of the spot, to each of which, if permitted, one extremity of one line of identity can be attached.
