

Logic of Events

1897-8 | Considerations for 8 Lectures | MS [R] 943:1

The second does not spring out from the first directly; but firstness looked at from a *second* point of view gives birth to a thirdness and the secondness comes out of the thirdness. This is the true logic of events.

1897-8 | Logic of Events | CP 6.218

It is true that the whole universe and every feature of it must be regarded as rational, that is as brought about by the logic of events. But it does not follow that it is *constrained* to be as it is by the logic of events; for the logic of evolution and of life need not be supposed to be of that wooden kind that absolutely constrains a given conclusion. The logic may be that of the inductive or hypothetic inference.
