Logical Simplicity

1906 | The Basis of Pragmaticism | EP 2:382

...to say that one term, say u, is *logically simpler* than another, say w, means precisely that the affirmation of w concerning any subject implies the affirmative truth of u concerning the same subject, while the affirmation of u does not reciprocally imply the affirmative truth of w; and it may be remarked, by the way, that *disquiparance* is thus necessarily involved in logical simplicity: but we need not argue from that principle.
