**Description:** Cognitive Semiotics is a peer-reviewed, multidisciplinary journal devoted to high-quality research, integrating perspectives, methods and insight from cognitive science, cognitive linguistics and semiotics, placing meaning-making into the broader context of cognitive, social, and neurobiological processes. The journal is a platform for the study of meaning-making writ large: in our interactions with the surroundings in all domains, in the natural as well as in the social world, in language and other sign vehicles, as well as in perception, and in action.
