Title: Kantism beyond the Schools: Recent contributions to the history of Kantism

Description: Thematic issue of *Philosophia Scientiæ* 20-1 (to appear in February 2016)
Guest Editors: Christophe Bouriau (Université de Lorraine) and Oliver Schlaudt (Universität Heidelberg)
Submission deadline: 01/01/2015
Notification date: 01/04/2015
Final version due: 01/09/2015

This issue of *Philosophia Scientiæ* aims to enrich our knowledge of the history of post- and neo-Kantianism, by presenting thinkers associated with these trends of thought who played a not insignificant role in 19th and 20th Century philosophy. There has been extensive scholarship dedicated to German idealism (Fichte, Schelling, Hegel) as well as the Marburg and Heidelberg Schools: the issue will focus in particular upon post- and neo-Kantianism out of these well-known trends, and concentrate on thinkers who took Kant as a point of departure in their intellectual paths, and sometimes came to alter important features of his critical approach (e.g., Schopenhauer, Fries, Lange, Renouvier, Helmholtz, Peirce, Riehl, Vaihinger, Couturat, etc.).

Submitted manuscripts should:

- be written in English, German or French
- contain an abstract of 10 to 20 lines in English and French
- not exceed 50.000 characters (including spaces and footnotes)
- be ready for blind reviewing to be sent to: christophe.bouriau [at] univ-lorraine.fr

Philosophia Scientiæ is a peer-reviewed scientific journal. It publishes research relating to epistemology, history and philosophy of science, especially in the field of mathematics, physics, and logic, without excluding any other scientific field. It is published by Kimé Editions (Paris).

Deadline: 01/01/2015
