**Title:** The Practical Turn: Pragmatism in Britain in the Long Twentieth Century

**Description:** Convenors: Professor Huw Price FBA, University of Cambridge, and Professor Cheryl Misak FRSC, University of Toronto

The Pragmatist approach to philosophical problems focuses on the role of disputed notions — e.g., truth, value or necessity — in our practices. As a self-conscious philosophical stance, Pragmatism arose in America in the late nineteenth century, in the work of writers such as Charles Peirce, William James and John Dewey. Since then many distinguished British philosophers have also taken this practical turn, even if few have explicitly identified themselves as Pragmatists. This symposium traces and assesses the influence of American Pragmatism on British philosophy, with particular emphasis on Cambridge in the inter-war period, on post-war Oxford, and on recent developments.
